

CASE STUDY

Private Investigators

Better intelligence means stronger cases.

Investigators are often tasked with uncovering details that shape legal or corporate outcomes. Manual searches of social media are time-intensive and inconsistent, often missing critical information.

Ferretly delivers comprehensive, AI-driven reports on subjects' public activity in under 30 minutes. From fraud detection to custody cases, investigators gain reliable intelligence they can act on with confidence.

Time lost on manual searches is evidence lost.

Ferretly's AI-powered **social media screening platform leverages 13 proprietary behavior** flags to scan public activity across major platforms including **Facebook, Instagram, X (Twitter), LinkedIn, TikTok, Reddit, Pinterest**, and more.

The system intelligently detects potential risks—from **hate speech and harassment to threats, discrimination, extremism, weapons, drugs/alcohol, sexual content, self-harm**, and other unprofessional conduct. Context and recency matter: the platform analyzes up to 10 years of public content while weighing the relevance and timing of findings.

Built for compliance and reliability, **Ferretly adheres to all FCRA, EEOC, and GDPR** requirements, making it safe for organizational use. Reports deliver consistent, easy-to-understand results with documented evidence for every finding, accessible through online dashboard, API integration, bulk upload, and continuous monitoring capabilities.
